MAINTENANCE WORK-ORDER — TICKET REPORT

Ticket Number	MT-2026-1256
Priority	High
Completion Date	(open — no completion date recorded)

Description / Work Detail

Unit inspected following Tommy Reyes's report of an active water heater leak and associated flooring damage. Water heater replacement completed in-house by John Smith; unit is back to operational for that system. However, inspection revealed the flooring damage is more extensive than can be addressed internally - recommend bringing in a professional flooring vendor to assess scope and perform repairs. Escalation to a qualified contractor is the next required step before this ticket can be closed.
